*Birds & Wildlife tours and guiding - Wildlife photography*

## **Fotorejse med Scanbird**

*Kære turinteresseret*

*Det er med stor fornøjelse, at Scanbird kan tilbyde fuglefotografer specielle rejser, hvor der især bliver fokuseret på fotografering af fugle og natur.*

*Rejserne til Rumænien og Ungarn giver Jer mulighed for at komme til at sidde i skjul og få fine billeder af mange af Sydøst-Europas specialiteter.*

*For at give Jer det bedste fotografiske udbytte kan der kun være 4-6 personer på hver rejse. Derfor er denne rejseform også lidt dyrere end traditionelle fuglerejser, hvor gruppe størrelsen er betydelig større.*

*Rejserne arrangeres uden rejseleder fra Scanbird, men lokale guider vil møde Jer i lufthavnen og tage sig godt af Jer under rejsen.*

*Turene til Rumænien og Ungarn er meget efterspurgte, og derfor kan Scanbird først få pladser i 2013. Dog kun hvis rejserne bestilles før april 2012.*

*Derfor vil jeg bede alle, som er interesseret i en rejse, om at kontakte Scanbird hurtigst muligt. Herefter vil vi se, om der er interesse nok til at reservere en rejse i 2013.*

*God fornøjelse med programmet*

*Erik Mølgaard*

## HORTOBÁGY NATIONAL PARK

High bird diversity and high hide disparity. This is a fantastic tour to photograph some rare and localised Eastern European bird species in our sophisticated nature inbuilt hide network installed in the well-known Hortobágy National Park.

### Timing:

Fixed dates but also available upon request

Recommended period between 20th April and 20th July

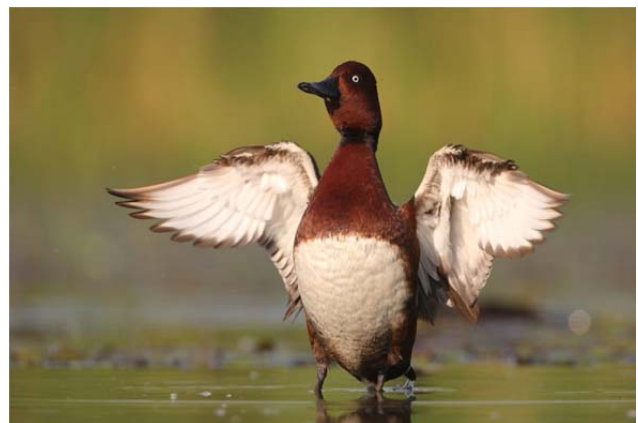

### Duration:

7 days (6 nights)

### Photo hides and species:

We have five full days for photography allowing ten different photo sessions (five mornings and five afternoons). We will use minimum four different hides which will give you an opportunity to have two sessions in each hide plus a return to the most preferred one. Or, alternatively, you can choose to try a fifth hide.

We can visit the „Pygmy Cormorant Hide” which is located in deeper water and is suitable to take photos of fish-eating birds and ducks (Pygmy Cormorant, Spoonbill, Ferruginous Duck etc.). We will also use the „Reedbed Hide”, which is good for skulking reedbirds as well as for herons and egrets. Our prime target will be Little Crake and Night Heron but Water Rail, Little Bittern and various passerines such as Bearded Tit also possible. Another hide we will use is the „Red-footed Falcon Tower”, which gives an intimate insight into the private life of these magnificent raptors. Our visits to the „Passerine Drinking Hide” vary greatly but provided weather conditions are adequate many sought-after species are possible (Middle-Spotted Woodpecker, Collared Flycatcher, Hawfinch etc.). In early April we offer the „Great Bustard Hide” Also if we have time we might visit one of our „Mobile Hides” or spend some time with photographing herons and egrets in flight. We have a „Mobile Hide” for Roller and a „Shorebird Hide” for waterbirds (mainly waders and egrets) plus anything interesting in that particular year!

Upon request we organize one day for „stalking photography” targeting any possible species available in the area. For more information (available hides, comfort, hide technical information, bird species) visit our [hides](#) menu item.

**Logistics:**

Our daily routine is to have two photo sessions a day. The morning session usually starts at ca. 04:00 and finishes at ca. 10:00. Then the photographers have lunch and a three-hour rest before going out on the afternoon session to a different hide (15:00–20:00). At the Great Bustard Hide you have to stay in the hide from 04:00 to 19:00 because the birds are very sensitive and once disturbed they can abandon the display area.

**Recommended equipment:**

This tour will offer you very diverse photographing opportunities. Therefore, we suggest that you bring along lenses from fish-eye and wide angle to 300mm and 500mm ones.

**Expected number of birds species photographed on this tour:**

35-50 species

**Group size and prices:**

Tour price depending on the number of participants.

The minimum group size is 2 photographers

The maximum group size is 6 photographers

Above 3 photographers we have 2 local guides as most hides take 3 photographers

All the prices below based on double occupancy. Single room supplement is **1500 Danish Kroner/person**.

**Standard comfort level:**

4 participants: **9.490 Danish Krone/person**

5 - 6 participants: **8.890 Danish Krone/person**

*If you are less than 4 participants ask Scanbird for a special offer.*

**The price includes:**

Budapest-to-Budapest all inclusive

The use of our unique photo-through panorama hide system

All transportation throughout the tour with 4x4 cars if needed.

All meals

All accommodation

All Hortobágy National Park and Hortobágy Fish Farm entrance fees

Local guides (one guide takes maximum 3 photographers)

**The price excludes:**

Alcoholic drinks

Services of personal nature (telephone calls, laundry etc.)
